

Generation

Powerful Solutions

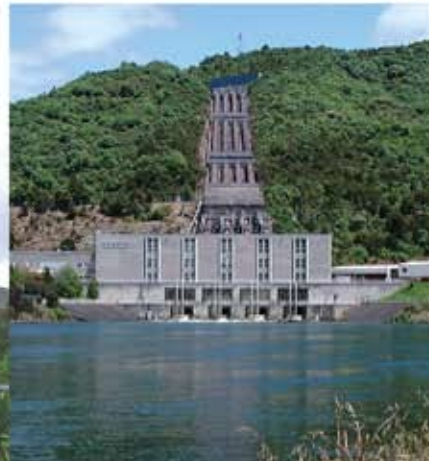

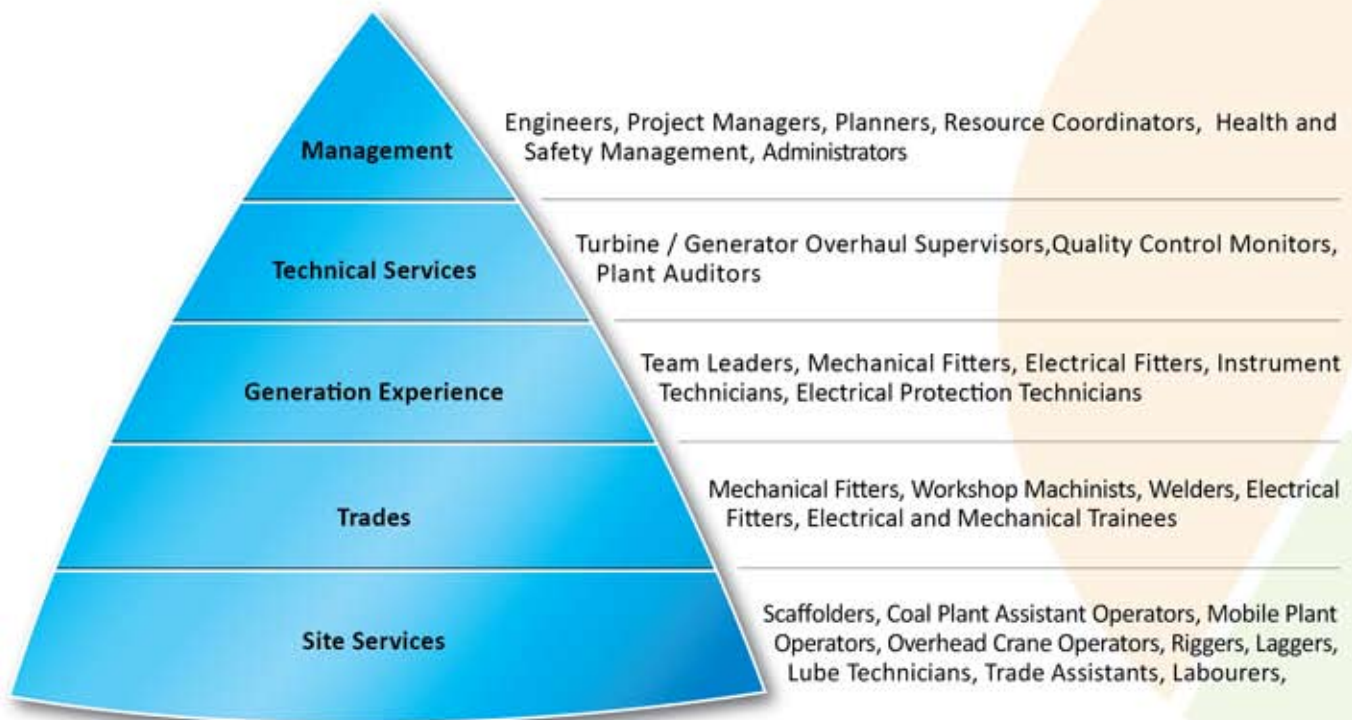

Singer has provided services to the Power Generation Industry for the past decade, providing day to day Site Services and Maintenance Trade Teams. We pride ourselves in managing additional resources for major plant overhauls assisting our clients with experienced resources to meet the plant needs and shutdown time frames.

We are committed to a Training Strategy to improve the performance of our employees deployed within the Generation Services Industry, now and into the future.

Singer Generation Services extend into the Thermal, Geothermal, Hydro and Gas market segments.

Our Resource Solution

Construction Services

Through our proven skills and experience, we will assist you with your plant modifications, upgrades or extensions. From planning and project management to installation, **Singer** are your turn key provider for your electrical and mechanical CAPEX. We will take your design and turn it into a working reality.

Maintenance Services

Whether it be a full maintenance solution, support for your maintenance teams or skills for planned outages, **Singer** has the knowledge and innovation to safely assist you to maintaining the reliability of your assets. PM's or Defects, we repair, record and provide feedback into your Maintenance Management System.

Automation Services

Control and monitoring are the essential elements for providing flexible generation in today's market. As your plant expands and technology improves, **Singer** can assist you in modifications to existing systems or providing new stand alone systems that are compatible with existing infrastructure.

We understand that safety is choice not chance. We strive daily for improvement to maintain our reputation as an industry leader.
